SHAPING EXCELLENCE

CIVIL
ENGINEERING

APPLICATIONS

Our products - such as manhole covers, grates, gullies and drainage systems - combine durability, safety and regulatory compliance to ensure long-lasting performance in any environment.

Funosa's cast iron components are designed to meet the demands of a wide variety of civil infrastructure projects.

Our solutions are present in:

TRUSTED BY

OUR COMMITMENT

At FUNOSA, we are committed to delivering foundry solutions that set new standards in civil engineering. Every component we produce—manhole covers, grates, gullies, and urban drainage systems—is designed with precision and manufactured under the strictest international regulations.

As the only foundry in the sector certified under IATF 16949, we bring the highest level of quality assurance to civil infrastructure projects, ensuring durability, safety, and long-term performance. More than a supplier, FUNOSA is a trusted partner for municipalities, construction companies, and engineering firms across Europe.

UNE-EN 124-2

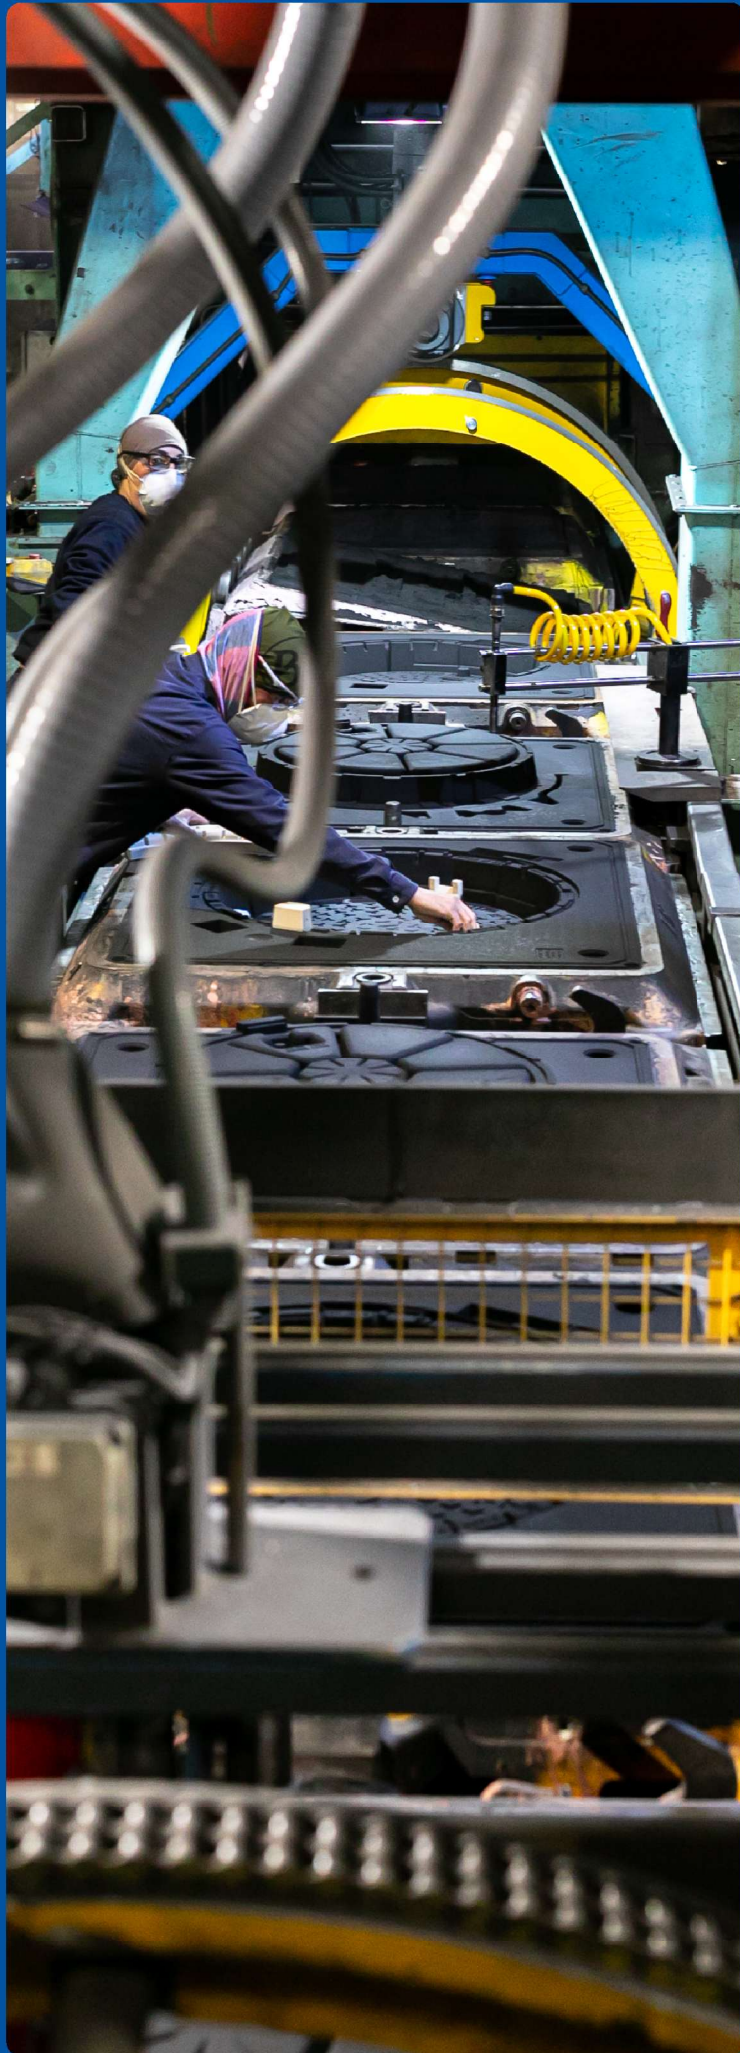

INNOVATION & RESPONSABILITY

Light footprint.

- 100 % recycled scrap, low waste, reusable sand systems, energy optimization
- Technical capability allows us to deliver solutions combining precision, durability and adaptability
- Proactive and co-design approach
- High customization capabilities of any product
- Cost & lead times optimization
- Cost & lead times optimization Using advanced tools such as SOLIDWORKS, NOVACAST, ...

QUALITY

MOULDING

Vertical and horizontal moulding lines:

- DISAMATIC D3 Z555 750 × 570mm up to 25kg
- HANSBERG: 1100 × 1100 × 250/300mm up to 120kg

PAINTING

- In-house Epoxy powder coating
- In-house water-based dip coating

ADDED VALUE

- Full in-house design and engineering support
- High-volume capacity with agile customization
- Durable, safe and regulation-compliant
- EU designed and fabricated
- Trusted by public and private infrastructure developers
