SHAPING EXCELLENCE

VALVES &
FITINGS

Where flow
meets precision

ENVIRONMENT

Built to last. Manufactured responsibility.

Funosa integrates sustainability across all production processes:

- Recycled materials
- Energy optimization
- Waste minimization
- Durable, low-maintenance components
- Support for eco-design and carbon reduction targets
- Full batch traceability

QUALITY

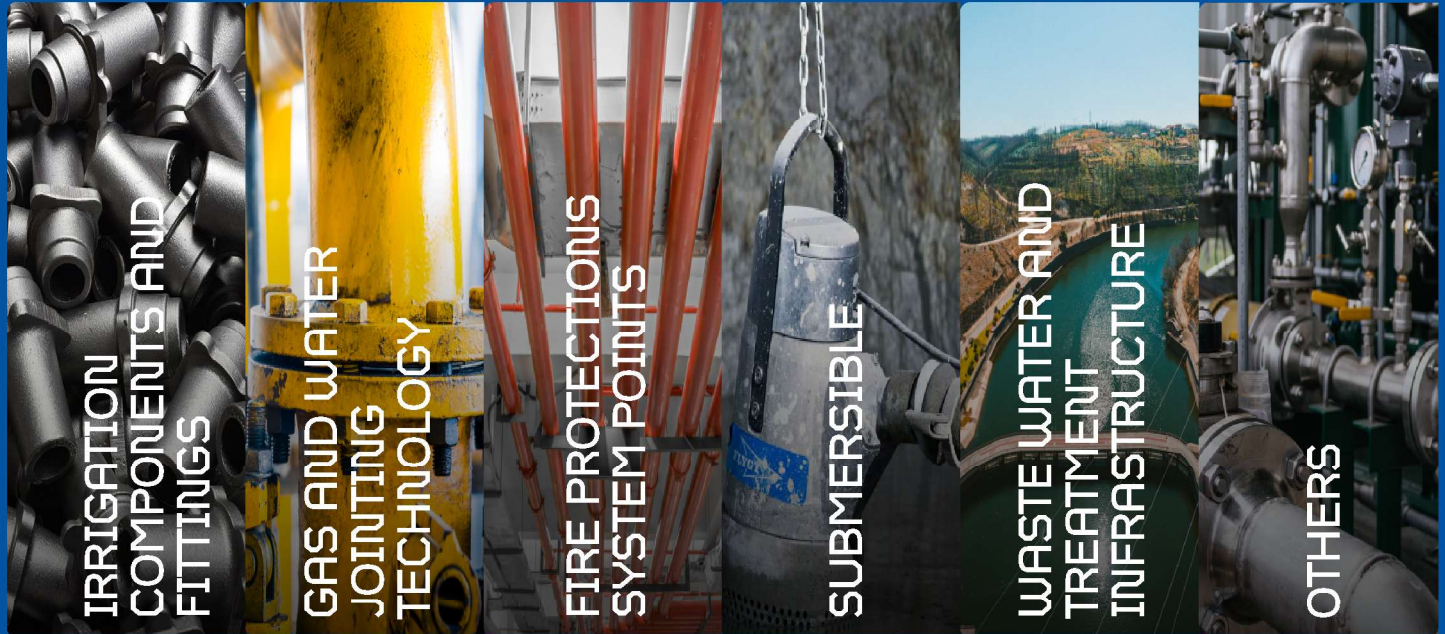

APPLICATIONS

Our parts are designed to ensure durability, pressure resistance, and dimensional precision in key sectors such as residential and industrial installations, heating and boiler systems, firefighting networks, wastewater treatment, and agricultural irrigation.

We adapt to every technical requirement to guarantee performance, compatibility and system reliability.

Our solutions are present in:

SOME PRODUCTS

Funosa

FUNDICIONES DE ODENA, S.A.
Crta. N-II Km. 555'2, 08711 Odena, Barcelona

WHAT MAKE US DIFFERENT

Our own spanish foundry.
Made in EU

More than 30,000 T
distributed across

Surface integrity and
porosity control

Experts in ductile iron
for high-pressure and
corrosive environments

More than 30,000 T
distributed across

Precision for sealing,
threading and hydraulic

Fast industrialization of
complex geometries

In-house simulation, cores
and tooling manufacturing

Engineering team focused
on reducing machining
time and cost

MOULDING

Vertical and horizontal moulding lines:

- DISAMATIC D3 Z555 750 × 570mm up to 25kg
- HANSBERG: 1100 × 1100 × 250/300mm up to 120kg

PAINTING

- In-house Epoxy powder coating
- In-house water-based dip coating

ADDED VALUE

- Full in-house design and engineering support
- High-volume capacity with agile customization
- Durable, safe and regulation-compliant
- EU designed and fabricated

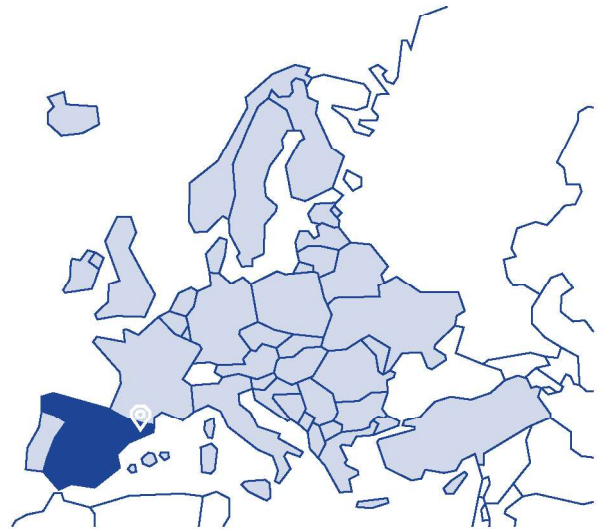

WE

Casting trust into every connection. With over 50 years of experience in casting parts for the valve and fittings sector, Funosa is a trusted partner for manufacturers in **residential, industrial, HVAC, firefighting, wastewater and irrigation systems.**

We specialize in custom cast iron components - from **complex valve bodies to high-precision fittings** - and supply **more than 30.000T of parts across Europe.** Our foundry delivers consistent performance, certified quality and engineering support from prototype to serial production.

ENGINEERING

From drawing to casting — we make it real.

Our engineering team works directly with your product designers to:

- Optimize castability and reduce post-processing
- Integrate simulation and flow analysis
- Create complex cores and internal channels
- Ensure repeatable dimensional control

Whether it's a high-pressure valve or a compact residential fitting, we adapt the casting to fit your production needs.
